WDD

CONSULTING SERVICES

Clearer communication. A practical next step.

For small teams seeking clearer websites, messages, marketing materials or workflows.

WDD - Web Dev and Design - helps organize information, clarify communication and use technology with human judgment.

What we could deliver

Workflow Clarity Review

Proposed service

- A current-state workflow map
- Three prioritized improvements with owners and next actions
- One source-checked worked example
- An editable action plan and handoff

Or begin with one separately scoped piece

One website page

Agreed content/layout changes and a checked inquiry route.

One message

A supplied draft reviewed for clarity and unsupported claims, with a worked revision.

One flyer

Clear information hierarchy, owner-approved details and an editable layout with an agreed export.

A Workflow Clarity Review covers one workflow. A website page, message or flyer is a separate scope. Scope, delivery capacity and fees are agreed individually before work is accepted.

How an engagement would work

1 / Define

Agree the audience, purpose, supplied facts, output and boundaries.

2 / Review

Work through the draft together; the business owner checks facts and makes decisions.

3 / Handoff

Provide the agreed editable piece and next action. Publication is a separate approval.

Ask about a review or one piece.

Email jamieldavila@gmail.com. Describe the review or piece, audience and desired result, timing, decision-maker and available approved facts or materials.

General details only; no passwords, customer records or confidential files. Tell us if you prefer written communication.

Your email app handles the inquiry. No receipt or booking is confirmed.

Own-brand demonstrations show design choices, not client results.
